

Doctor Lang has restored my faith in physicians. I was in a lot of pain and getting nowhere in the system I was in. I had been to many doctors and specialists and felt completely hopeless and like no one cared at all. My very first visit to Dr. Lang was like a ray of light in a dark room.

His nurse, Dedra, was kind and welcoming when I walked in and Dr. Lang took the time to listen to my entire story and did not rush me out in 15 minutes. He took immediate action helping me to sort out what I should do next, where to go and what doctors and therapists to see. He assured me that he would do whatever he could to help me find out what was wrong with me and to do something about the pain I was in ---- He did exactly that. Not only does Dr. Lang care about his patients more than any doctor of any kind that I have been to but he is extremely good at what he does. I find this to be rare and invaluable combination. I would HIGHLY recommend him to anyone!
